DETAILED ACTION

Receipt is acknowledged of applicants' Preliminary Amendment filed on October 24, 2002.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-20, 23, 24, 27 and 54, drawn to a method of printing manufacturing information onto an ingestible sheet and the product of that method, classified in class 347, subclass 20.
- II. Claims 21 and 22, drawn to a method of laminating the ingestible sheets, classified in class 156, subclass 325.
- III. Claims 25 and 26, drawn to a sheet encapsulated to form a tablet, classified in class 424, subclass 400.
- IV. Claims 28-53, drawn to a dispensing method and a product, classified in class 221, subclass 194.
- V. Claims 55-67, drawn to an ingestible sheet, classified in class 424, subclass 443.
- VI. Claims 68-72, drawn to a kit of parts, classified in class 206, subclass 524.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III, IV, V and VI are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP §

Art Unit: 1615

808.01). In the instant case the different inventions are different methods and products. Group I is drawn to a method of printing on a sheet and the product of that method. Group II is drawn to a method of laminating and the product of that method. Group III is drawn a sheet encapsulated to form a tablet. Group IV is drawn to a method of dispensing a bioactive fluid. Group V is drawn to an ingestible sheet. Group VI is drawn to a kit of parts containing and ingestible sheet and an ink cartridge. Each group has a different mode of operation and/or different effects. Therefore, the inventions of each group are unrelated.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
